Hi Janette,

The 1986 map that shows it north of the property boundary but not that far north is the same one I found this morning, attached to make sure we are talking about the same thing.

For 8801 I took a look at the RI report and couldn't find mention of it either though I only have what is available on the Ecology website, I have not FOIA'd to do a deeper dive in that site's files. Did you review all the sample maps from the RI to look for it?

Sorry I am not yet more helpful on that front.

Have you heard back from them on schedule? I saw your other note and we noticed that they had what looked like injection drilling equipment staged on Friday when we went out to do site check work. I plan to go by the site this week too so will see what things look like.

Thanks,

Tasya

Subject: location of former incinerator on 8801 site

Hi Tasya. I'm trying to verify the location of the former incinerator that was located at the 8801 property north of FRP. The D&M 1986 report shows it north of DM-3A/3B, as does the agency draft CMS work plan. But I vaguely remember seeing somewhere that it might have been located further up the shore on 8801, but I can't seem to find that again. There is some dioxin/furan soil contamination in that area which supposedly will be excavated (Area 4 – see map below). Do you have any 8801 documents that Ecology doesn't have on the site webpage, which might show the incinerator location? Could you look in your copy of the RFA and see what that shows re: location of incinerator?

Unfortunately I'm not finding that any samples were analyzed for D/F in that area of the incinerator just north of the property line. Some of that area is supposed to be excavated anyway (Area 3).

Janette
